Professional Experience

SOFTWARE ENGINEER, 1/2012 to Present
TOTVS S.A. - Joinville, Santa Catarina, Brazil

"Full stack web developer"

- -

I currently work on the fluig Identity team (https://www.fluig.com/identity), a fully SaaS product responsible for identity management within the fluig platform.

I work on Identity's cloud architecture development, interacting with AWS services (SNS, SQS, EC2, CloudWatch, etc.).

- -

I am a member of the standardization committee of API TOTVS and I am directly involved in its development, which is of great professional satisfaction, since standardizing the API's of the largest technology company in the country is a great challenge.

- -

Previously, I was responsible for developing, maintaining and updating the web development platform fluig (https://www.fluig.com/).

Providing technical leadership to Junior Engineers and developing the overall product architecture.

- -

Backend - java 8, javaee, restful, api, aws;

AWS - SNS, SQS, EC2, CloudWatch;

Frontend - html 5, angularjs, jquery, css;

Quality - rest assured, hamcrest, junit, selenium;
